

Ashish Gupta

AI Product Manager/Owner | GenAI & LLM Products | Fintech, Media & Enterprise

Exton, PA · 703-678-5431 · analystgupta5@gmail.com · linkedin.com/in/analystgupta5 · agupta678.github.io/ashish-gupta-resume

PROFESSIONAL SUMMARY

AI Product Manager/Owner with 12+ years leading product and business analysis across finance, media, and enterprise technology — Deloitte, Disney, Moody's, Broadridge — now applying that same rigor to AI product development. Experienced in designing and iterating LLM prompts, structuring AI outputs for system integration, and building evaluation frameworks to measure AI output quality. Actively deepening hands-on experience with RAG, AI agents, and LLM evaluation through self-directed projects. Seeking AI Product Owner/Manager roles — especially teams integrating GenAI into existing Fintech or enterprise products.

U.S. Citizen and eligible to obtain a U.S. security clearance.

SKILLS & CERTIFICATIONS

AI & ML	Large Language Models (LLM), Prompt Engineering, Generative AI, RAG, AI Product Management, AI Output Evaluation, Microsoft 365 Copilot, GitHub Copilot, Claude AI

Certifications	Google AI Essentials · AI For Everyone (DeepLearning.AI) · Elements of AI (Univ. of Helsinki) · AI-Empowered SAFe® 6 PO/PM · PSPO I · PSM I · CSM

PROFESSIONAL EXPERIENCE

AI Product Manager/Owner — Deloitte	Jan 2025 – Present
- Led AI-augmented product ownership for Docubuilder, a Component Content Management SaaS platform serving Morgan Stanley across mutual fund, equity, and mortgage business lines. - Designed reusable AI-driven prompt libraries and LLM workflows to automate conversion of stakeholder discussions, emails, and meeting notes into Jira-ready user stories and acceptance criteria — reducing story authoring time by ~40%. - Applied Microsoft 365 Copilot and GitHub Copilot for AI-assisted requirements analysis, identifying ambiguities and compliance gaps before development. - Defined AI product roadmaps and supported client enablement through solution positioning and product demonstrations. - Owned end-to-end delivery for API-driven system integrations and migrations, partnering with front-end/back-end teams and third-party vendors in a SAFe Agile framework.	
Product Owner / Lead Business Analyst — Broadridge Financial Solutions	Jan 2023 – Dec 2024

- Delivered a Contract Lifecycle Management (CLM) application for a multinational professional services firm, defining requirements for contract automation workflows across the full lifecycle.
- Led requirements elicitation and backlog management, translating complex business rules into structured user stories with measurable acceptance criteria.
- Partnered with engineering, QA, and compliance teams across the full SDLC — from requirements through UAT — in an Agile/Scrum delivery model.
- Facilitated JAD sessions, cross-functional workshops, and sprint reviews with senior stakeholders.

Sr. Consultant — Aetna / Infosys

May 2021 – Dec 2022

- Supported API-driven product development for a healthcare technology platform, creating Swagger documentation, mapping API response specifications, and validating integrations via Postman.
- Developed user stories in Jira with Gherkin-based acceptance criteria; facilitated daily standups, sprint planning, and backlog refinement.
- Analyzed end-user workflow challenges and prioritized backlog items with the Product Owner to align with product vision.

Sr. Technical Product Manager — The Walt Disney Company (ESPN)

Oct 2017 – May 2021

- Defined roadmaps and prioritized backlogs for ESPN's customer-facing Cloud Web Application API platform — a microservices architecture supporting international media businesses.
- Oversaw migration and integration of legacy Java/Oracle systems to a modern cloud platform, reducing technical debt and enabling faster feature delivery.
- Partnered with engineering, design, and business stakeholders to translate business strategy into executable product backlogs and sprint plans.

Sr. Business Analyst — Moody's Investors Service

Dec 2014 – Jul 2017

- Led IT integration and migration of eFM functions to Moodys.com, eliminating legacy environments and integrating authentication with Moody's administrative systems.
- Authored BRDs, facilitated JAD sessions, led UAT, and provided regular stakeholder status updates across this high-visibility financial data platform migration.

Earlier Experience: Sandata Technologies — Sr. Business Analyst (Apr 2013 – Sep 2014) | Bed Bath & Beyond — Business Analyst (Nov 2011 – Apr 2013)

EDUCATION

Bachelor of Science, Finance — George Mason University, Fairfax, VA — 2009
